Credo InfoLit Modules LTI Links

In your Blackboard course sections, you may create web links to Credo InfoLit modules for your students to complete. The modules are very helpful in helping your students develop or improve upon their research and formatting skills.

Please note that if you are adding these modules/LTI links to an online course, do not assign grading points to the items—even quizzes--as this may skew the grading schema within the course. Contact the subject matter expert (or course developer) for the course you are teaching to discuss perhaps adding the modules as gradeable assignments for future iterations of the course.

Refer to the following video tutorial to learn how to set up web links to Credo materials in your Blackboard course(s).
